Journal of Fluid Mechanics **Volume 313 25 April 1996**

A. Farooq & G. M. Homsy Linear and nonlinear dynamics of a differentially heated slot under gravity modulation *page* 1

J. A. P. Aranha Second-order horizontal steady forces and moment on a floating body with small forward speed 39

R. T. Goodwin & W. R. Schowalter Interactions of two jets in a channel: solution multiplicity and linear stability 55

W. Choi & R. Camassa Weakly nonlinear internal waves in a two-fluid system 83

O. Igra, J. Falcovitz, H. Reichenbach & W. Heilig Experimental and numerical study of the interaction between a planar shock wave and a square cavity 105

A. Shajii & J. P. Freidberg Theory of low Mach number compressible flow in a channel 131

P. I. Bell & A. M. Soward The influence of surface topography on rotating convection 147

T. N. Phung, J. F. Brady & G. Bossis Stokesian Dynamics simulation of Brownian suspensions 181

J. Jiménez, H. K. Moffatt & C. Vasco The structure of the vortices in freely decaying two-dimensional turbulence 209

J. Jiménez Algebraic probability density tails in decaying isotropic two-dimensional turbulence 223

F. A. Jaberi, R. S. Miller, C. K. Madnia & P. Givi Non-Gaussian scalar statistics in homogeneous turbulence 241

R. R. Sundararajakumar & D. L. Koch Non-continuum lubrication flows between particles colliding in a gas 283

A. S. Sangani, G. Mo, H.-K. Tsao & D. L. Koch Simple shear flows of dense gas–solid suspensions at finite Stokes numbers 309

L.-G. Sundström & S. Kimura On laminar free convection in inclined rectangular enclosures 343

C. J. Chapman Sound radiation from a cylindrical duct. Part 2. Source modelling, nil-shielding directions, and the open-to-ducted transfer function 367

M. S. Thurlow, B. J. Brooks, P. G. J. Lucas, M. R. Ardron, J. K. Bhattacharjee & A. L. Woodcraft Convective instability in rotating liquid ^{3}He–^{4}He mixtures 381

CORRIGENDA 408

REVIEWS

Fluid Vortices, edited by S. I. Green 409

Fluid Mechanics, by D. Pnueli and C. Gutfinger 411
